Contract value: \$7.5M

Duration: 30 days

Peak manpower: 102

Subcontractors: 2

Services provided:

Project Management

Construction

Instrumentation and electrical

Project achievements

Successfully executed additional slowdown for client in April 2015

Danos turnaround manager and turnaround planner integrated with client team during planning phase

Danos' Project Management Team assisted client from beginning to end of their turnaround: from identifying and planning the work to training and mobilizing the workforce to safely bringing the plant back online, Danos worked alongside the client team every step of the way.
